

Cataloging Electronic Databases (Continuing Resources)

These procedures will typically apply to OhioLINK databases although we could have individual databases that we subscribe to locally. Generally there will be records available in OCLC. Ideally we would prefer a record which is specific to OhioLINK if that is appropriate.

Key fields to check for include:

LOCATION: conre (if appropriate)

SUPPRESS: g

362: Coverage of resource

506: Appropriate statement such as: OhioLINK membership required for access

520: include a summary of the database contents

550: Appropriate statement such as: Available through agreement as a research database to OhioLINK member libraries

710: include a corporate added entry for Ohio Library and Information Network

856: |u URL In the |z subfield include Connect to {title} with no additional wording, e.g.

|uhttp://www.ohiolink.edu/db/apd.html|zConnect to American poetry|2http

Other elements of cataloging will be decided as they come up.

Attach **item** record:

ITYPE: 178 eresource

LOCATION: conre

STATUS: g

Call number: 099 ELECTRONIC RESOURCE

May add 090 with LC class number also

If there is a need to attach a local holdings/checkin record, that record must be suppressed from the public catalog

If not all libraries 'own' the item, there should be an item record for each owning library rather than a single 'conre' item.
